	09:00	Merc Pacif	7.178
	17:30	Aurora	7.055
	19:30	APSN	3.700

The APSN and Aurora nets, and all the Tues ERC HQ nets, except the 1500hr 20M net, are on UTC time which means that when we change our clocks back an hour for MST, the net times move up an hour.

All the other net times remain the same because they are run on local time.

Some Edmonton MARA members get together the first Sun. of the month at 1800hr on 147.45 MHz for an informal simplex net.
